Certificate Course in
"Printed Circuit Board (PCB) Designing"

2018-2019

Report

The department has always organized different student centric activities for the overall development of students. This year department has decided to introduce certificate course in Printed Circuit Board (PCB) Designing for Undergraduate students. As we know every electronics circuit requires circuit board for components mounting and for their interconnection. This course helps students to learn basic components of electronics, PCB circuit designing and assembling. After the completion of this course students will able to design and develop Printed circuit boards.

Notice regarding the admission for this course was displayed on 13th August 2018 and duration of the admission process was 13th August 2018 to 31st August 2018. The duration of this course was 6 months (or 150 Hours) during the period 4th September 2018 to 28th February 2019. Total 10 students of B.Sc. I was enrolled for this course. Theory and Practical sessions were starts from 4th September 2018 and concludes on 28th February 2019. In theory sessions students learned Identification of Electronics components, development tools for PCB designing and in Practical session's students learned PCB etching, drilling and mounting electronic components.

Practical and Theory examination was conducted on 7th March 2019 and 11th March 2019 resp. Total 10 students were appeared for the examination and all students were pass the theory and Practical Examination in First Division. The certificates were distributed to all passed students.
